I. BUILDING LEVEL SCHOOL SAFETY PLANS

Each building has developed a Building Level School Safety Plan which shall provide instruction to students, staff, and visitors to prepare them to respond to disaster and emergency situations in a practical way. It shall be standard operating procedure for staff and students to be familiar with the Building Level School Safety Plan to ensure each individual knows what to do in an emergency and how to do it should the need arise. Building Level School Safety Plans identifies potential sites of emergency including, but not limited to, buildings, grounds, buses, field trips, and work sites, and contains the following elements:

- Procedures for the safe evacuation, appropriate sheltering, or securing of students, staff, and visitors in the event of serious violent incident or other emergency
- Designation of an emergency response team comprised of school personnel, local law enforcement officials, and representatives from local, regional and/or state emergency

response agencies; other appropriate incident response teams; and a post incident response team that includes appropriate school personnel, medical personnel, mental health counselors and others who can assist the school community in coping with the aftermath of a violent incident

- Procedures for assuring that crisis response and law enforcement officials have access to floor plans, blueprints, schematics or other maps of the school interior, school grounds, and road maps of the immediate surrounding area
- Establishment of internal and external communication systems in emergencies
- Definition of the chain of command in a manner consistent with the National Interagency Incident Management System/Incident Command System
- Coordination of the school safety plan with the statewide plan for disaster mental health services to assure that the school has access to federal, state, and local mental health resources in the event of a violent incident
- Procedures for review and the conducting of drills and other exercises to test components of the emergency response plan
- Policies and procedures for securing and restricting access to the crime scene in order to preserve evidence in cases of violent crimes on school property

III. PLANS OF ACTION

To account for the variable character of disaster emergencies and the extent of advance warning, there are four different plans of action to ensure the health and safety of students, staff, and visitors: Cancellation Prior to the Start of School, General Evacuation (including evacuation of handicapped individuals), General Go-Home, and General Shelter.

A. Cancellation Prior to the Start of School

The Superintendent or his/her designee(s) shall make the decision to close schools/offices for the health, welfare, and safety of the students, staff, and visitors. Notice will be given to staff, parents, and students through the use of radio and television stations as well as automated email and phone notifications.

B. General Evacuation

This plan shall be used as a guideline when conditions within a building present an immediate health or safety risk to the occupants and vacating the building would reduce or eliminate those risks.

C. General Go-Home Plan

This plan shall be used when it is necessary to return students to their homes as rapidly as possible.

D. General Shelter Plan

This plan shall be used in crisis situations when it has been determined that being inside the building is safer than being outside. The plan consists of three parts: Take Cover, In-Building Shelter, and Off-Campus Shelter.

1. Take Cover

In the event of imminent danger due to natural or manmade disasters, this action will direct students, staff, and visitors to “take cover” in their immediate location.

2. In-Building Shelter (*Safe Areas*)

Each building shall determine *Designated Safe Areas* to be used for shelter when conditions allow the safe movement of students, staff, and visitors through the building.

3. Off-Campus Shelter

This plan shall be used when it becomes necessary to move students, staff, and visitors off campus completely and immediately

IV. EVACUATION OF DISABLED STUDENTS, STAFF, AND VISITORS

Each Building Level School Safety Plan includes evacuation procedures for all disabled persons and identifies assigned responsibilities and procedures to assist the disabled. Each building administrator shall work with local emergency responders to ensure their understanding of the protocols included in their Building Level School Safety Plan.

V. EVACUATION AREAS

Evacuation areas are identified in the Building Level School Safety Plan.

VI. WEATHER CONDITIONS AND EVACUATION

The possibility always exists that students and staff may have to evacuate a building during inclement weather conditions. The Building Level School Safety Plans addresses the procedures for prolonged outdoor exposure;

VII. RE-OCCUPANCY OF A SCHOOL BUILDING

After a building has been cleared by law enforcement or fire department personnel, the building administrator or his/her designee shall be responsible for making the decision to reenter the school building. Based upon information received, one of three decisions shall be considered by

the building administrator: (1) reoccupy the building and resume classes; (2) relocate the building occupants to another facility (sheltering); or (3) activate the plan for early dismissal.
