

Introducing **Little Sparks**

Sparking creativity and igniting innovation in young minds
A preschool* exploration program with a STEAM focus!

Research supported by the National Science Foundation shows that young children demonstrate a readiness and enthusiasm to engage in science, technology, engineering, and math thinking. Let's think and build and invent together in our art inspired STEM Explorium.

Young explorers will immerse themselves in nature and outdoor play (rain or shine!), as well as hands-on learning in science, technology, engineering, art, and math. Children will be guided by master teachers and special guest educators including naturalists, artists, scientists, and more!

Our distinctive challenge-based curriculum ignites an interest in the "big ideas" of science and critical and creative thinking.

Our lessons are aligned with the Next Generation Science Standards.

See your child "glow" at Little Sparks! 6 weeks sessions beginning Sept 28th, 2017

Thursdays: 12:30-3:00 PM

\$270 per session. Due to the highly interactive and hands-on nature of the programs, space is limited to enable the highest level of engagement.
* Must be age 4 by Dec 1, 2017

For additional information or to register for Little Sparks, please contact Carole van Duyn, Museum Program Manager at carole@maritimeexplorium.org

About the Maritime Explorium

The Explorium seeks to support and develop the next generation of creative thinkers and problem solvers. Our curriculum, exhibits and educational approach are designed to spark innovation and build confidence by embracing the "fail forward" concept, and foster teamwork through minds-on workshops and activities that pose challenges with multiple outcomes or solutions. The Maritime Explorium is a 501(c)3 not-for-profit and is chartered with the New York State Department of Education.
